DETAILED ACTION

Response to Amendment

1. The amendments to the claims and remarks filed on December 21, 2010 have been fully considered. The 35 USC 112 1st paragraph rejection is maintained. Applicant has argued that diethyl ether is also enabled because it is used in a washing step following the precipitation of amorphous atorvastatin calcium. However, the claims require the limitation that atorvastatin calcium is precipitated and isolated from a solvent to produce amorphous form. That the solvent is used after amorphous atorvastatin calcium is already formed does not enable the formation of this amorphous form by using the solvent to precipitate the chemical compound. Thus, based on this and the unpredictability in the field of producing solid/amorphous forms of atorvastatin, it is maintained that the claims as written are not enabled.
2. Claims 26 and 31 require the limitation that the solvent is diisopropyl ether. Therefore, the 35 USC 112 1st paragraph rejection is withdrawn for these two claims. The claims are objected to because they depend from a rejected claim, however, would be allowable if rewritten in independent form. This ground of objection was necessitated by Applicant's amendments.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1626

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
